

Working Student (m/w/d) (up to 20h/week) OR

Internship (m/w/d) (3-6 months full-time)

Munich, Germany

Your tasks could be:

- Construction of hardware prototypes as well as test rigs and test equipment
- Co-operation in planning and implementation of embedded software and hardware
- Implementation of toolchains and software development environment
- Planning and execution of software/hardware tests as well as other verification steps
- Documentation of development and verification results
- Co-operation in flight mission management and flight control topics

Your skills and profile:

- You are enrolled in computer engineering, electrical engineering, aerospace engineering or a similar course of studies (third year Bachelor or higher, Master)

About Amazilia Aerospace:

Amazilia Aerospace is a young company in the heart of Munich, developing digital flight control systems and avionics components for unmanned cargo aircrafts with more than 500 kg take-off weight. Since the beginning of 2018, we develop systems, algorithms and software for the flight control and mission management for a big international logistics company as well as other civil customers.

- You are technophile, eager to learn and to prove yourself in projects in addition to your studies
- You are interested in construction with CAD development environments, software development or working with MATLAB/Simulink
- Previous experience in the aerospace industry is a plus!

What we offer:

We offer an exciting, varied and challenging environment in a young and international start-up. At Amazilia you can work independently and with a high degree of responsibility. To ensure the compatibility of your studies with the job, we are flexible in terms of your working hours. And of course, we offer an attractive salary and a nice office in the heart of Munich!

Depending on the specific topic and university requirements we can also offer to supervise study projects or the Bachelor's/Master's thesis.
