

We are looking for a

Working Student (m/f/x) (up to 20h/week) *OR*
Intern (m/f/x) (3-6 months full-time)

for **electronics development in aviation applications**

Munich, Germany

Your tasks:

Join our team to improve existing and develop new prototype electronic test and flight hardware for our rapidly growing fleet of project aircraft.

- Design of schematics, PCB layouts and production data for prototype test setups, control devices and power electronics in aviation
- Support or conduct reviews of electronic designs
- Testing of prototypes, support setup and maintenance of our lab and test environments
- Participate in hardware bring-up and embedded software development, if desired

Your skills and profile:

- You are enrolled in electrical engineering, information technology, computer engineering, mechanical engineering or a similar course of studies (third year Bachelor or higher, Master)
- You have gained first experience in the design of electronic circuits and PCB layouts
- You have worked with programs such as EAGLE or Altium Designer
- You communicate confidently in English at a professional level
- You are technophile, eager to learn and to prove yourself in projects in addition to your studies, and would like to see your work applied to flying applications
- Previous experience with aviation related applications, including model aircraft is a plus.

What we offer:

We offer an exciting, varied, and challenging environment in a young and international start-up. At Amazilia you can work independently and with a high degree of responsibility, with constant support from the rest of our team.

To ensure the compatibility of your studies with the job, we are flexible in terms of your working hours. And of course, we offer an attractive salary and a nice office in the heart of Munich!

About Amazilia Aerospace:

Located in the heart of Munich, Amazilia Aerospace provides customized flight control system solutions for new aircraft designs, novel configurations and retrofit installations. Passion for aviation is at the heart of our company. We are continuously moving forward, innovating together with our national and international customers and partners. Our range of aircraft application spans from 600kg UAVs to turboprop and jet aircraft.
