

We are looking for a

Working Student (m/f/x) (up to 20h/week) *OR*
Intern (m/f/x) (3-6 months full-time)

Munich, Germany

Join our team to develop new and improve existing flight control solutions for our rapidly growing fleet of project aircraft!

Your tasks could be:

- Construction of hardware prototypes as well as test rigs and test equipment
- Co-operation in planning and implementation of embedded software and hardware
- Implementation of toolchains and software development environment
- Planning and execution of software/hardware tests as well as other verification steps
- Documentation of development and verification results
- Co-operation in flight mission management and flight control topics

Your skills and profile:

- You are enrolled in computer engineering, electrical engineering, aerospace engineering or a similar course of studies (third year Bachelor or higher, Master)
- You are technophile, eager to learn and to prove yourself in projects in addition to your studies
- You are interested in construction with CAD development environments, software development or working with MATLAB/Simulink
- Previous experience in the aerospace industry is a plus!

What we offer:

We offer an exciting, varied, and challenging environment in a young and international start-up. At Amazilia you can work independently and with a high degree of responsibility. To ensure the compatibility of your studies with the job, we are flexible in terms of your working hours. And of course, we offer an attractive salary and a nice office in the heart of Munich!

About Amazilia Aerospace:

Located in the heart of Munich, Amazilia Aerospace provides customized flight control system solutions for new aircraft designs, novel configurations and retrofit installations. Passion for aviation is at the heart of our company. We are continuously moving forward, innovating together with our national and international customers and partners. Our range of aircraft application spans from 600kg UAVs to turboprop and jet aircraft.
